DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al (US006627812)

Kim et al disclose a chassis cover (132) comprising a hem assembly (Fig 3) adapted to mate with a chassis back (208) such that an interior surface of the chassis back is in secure physical contact with the chassis cover and wherein the hem assembly mated with the chassis back provides a tortuous path to electromagnetic radiation disposed to enter or leave the chassis assembly (col. 4, lines 30-40)(Fig 3)

Re claim 2, a first bend of 90 degrees, and a second bend of 90 degrees formed by bending the chassis cover between a chassis cover pre-step portion and chassis cover step portion (302) (Fig 3)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2831

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al in view of McMiller et al (US006194653).

The teaching of Kim et al as discussed above does not disclose one or more dimpled spring fingers

McMiller et al teach the use of dimpled spring fingers (Fig 3). It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the dimpled spring fingers with the structure of Kim et al for the purpose of providing a high level of EMI containment.

Allowable Subject Matter

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5-8 are allowed
